Career Objective

Python Backend Developer with expertise in Django, FastAPI, and database management, building scalable and secure web applications. Experienced in API design and AI integrations to optimize workflows and enhance user experience. Passionate about creating high-performance, automation-driven solutions.

Technical Skills

Languages and Database : Python, Django , FastAPI , HTML, CSS, PostgreSQL
Frameworks & Library : LangChain, HuggingFace, LLMs, VectorDB(Pinecone), OCR, RAG, JWT, Pandas(Learning), NLP(Learning)
Working Tools : VS Code, PyCharm, Postman, Docker, Render, Chat GPT, Rest APIs, Github, PgAdmin

Experience / Project

PlusYourSoftech Business Pvt Ltd (Delhi, India) **Feb 2024 - Jan 2025**

Junior Python Developer

1. Discord Chat Bot for Alfresco Community [Link]

- Developed a **Discord bot** for the **Alfresco community**, enabling seamless interaction with files and folders without accessing the Alfresco web interface.
- Implemented **file metadata retrieval, content extraction** and **OCR** for scanned documents, allowing users to query and manage files via chat commands.
- Integrated **Discord API, Alfresco API, Pinecone** and **OpenAI API** to provide fast and intelligent responses based on file content.
- Improved response retrieval speed 20%, enhancing user experience and efficiency in document management.

2. PDF Chat system for Digital signature website [Link]

- **Developed an AI-powered system** enabling users to chat with PDFs instead of reading lengthy contracts, improving accessibility and efficiency.
- Integrated **Retrieval-Augmented Generation (RAG)** to provide intelligent and context-aware responses based on document content.
- Built the system using **FastAPI** and **PostgreSQL**, ensuring fast performance and efficient data management.
- Utilized **LangChain, OpenAI API** and **Pinecone** to enhance response accuracy and optimize retrieval mechanisms.
- Improved user experience by enabling quick and precise extraction of information from complex documents.

3. Document Transfer Web Apllication [Link]

- **Developed a web app** for transferring/uploading files from **Salesforce** to **Google Drive, SharePoint, and Alfresco**.
- Built a **Django backend** with a **HTML, CSS, JavaScript** frontend for seamless user interaction.
- Managed user data efficiently using **PostgreSQL**.
- Integrated **Salesforce API, Google Drive API, SharePoint API, and Alfresco API** for smooth file migration.

Self Project

Go Cab (Under development) [Link]

- **Developed "GO CAB"**, a **rural area-based cab booking system**, in regions without existing with cab booking system.
- Built the **backend with FastAPI** for high-performance request handling and **PostgreSQL** for efficient user data management.
- Designed an interactive and user-friendly **React.js frontend** for seamless booking experience.
- Ensured smooth functionality and scalability to support cab services in underserved rural areas.

Educational Qualification

Magadh University *(Bodhgaya, Gaya, Bihar)* **2020-2023**
Mirza Ghalib College (Gaya, Bihar)
Bachelor of Computer Application (BCA) - 68%
